QUALITY POLICY

Brevetti C.E.A. operates in the field of manufacturing inspection machines, with the objective of meeting the needs and expectations of its customers and relevant interested parties, in a context characterized by increasing product complexity and more demanding application requirements.

Within its activities, Brevetti C.E.A. is constantly committed to pursuing excellence in Quality in accordance with ISO 9001:2015 requirements, while ensuring full compliance with applicable regulations related to Occupational Health and Safety, environmental protection, Legislative Decree 231, and the European GDPR regulation, promoting:

- the strengthening of its leadership position in the market through the growth of its customer base, turnover and entry into new sectors;
- the continuous improvement of product, service and process quality, ensuring full customer satisfaction through compliance with specific requirements;
- the improvement of process effectiveness and efficiency, with particular focus on project execution, lead time reduction and cross-functional coordination;
- the strengthening of the performance monitoring system, promoting the quality, completeness and reliability of data and KPIs to support decision-making;
- technological development to ensure products with high standards of functionality and quality;
- the improvement of the working environment and the continuous development of internal competencies;
- compliance with applicable laws and regulations, including those related to Health and Safety, Environment, products and services, progressively integrating emerging requirements (e.g. cybersecurity, sustainability and governance);
- the adoption of prevention-oriented practices:
    - for quality, through a risk- and opportunity-based approach;
    - for health, safety and environment, through continuous risk and environmental aspect assessment and the implementation of preventive actions;
- effective supplier selection, evaluation and management, ensuring alignment with technical, quality and performance requirements;
- employee consultation and participation on Health and Safety matters;
- employee awareness and training on company risks, in relation to their roles and responsibilities;
- the periodic review of this Policy and related objectives.

Brevetti C.E.A. defines annual objectives consistent with this Policy, including:

- improving customer satisfaction through performance monitoring, complaint management and adherence to delivery timelines;
- improving the quality, reliability and use of company KPIs, ensuring effective monitoring against targets and supporting decision-making;
- continuing operational optimization to improve efficiency and effectiveness through process review and improvement;
- strengthening coordination among the functions involved in key processes;
- continuously developing and updating employee competencies;
- maintaining Quality certification (ISO 9001) and promoting compliance with applicable regulations related to Health and Safety, Environment, Legislative Decree 231 and GDPR;
- progressing in the integration of NIS2 Directive requirements and sustainability topics;
- promoting a quality culture oriented towards continuous improvement and shared responsibility.

Brevetti C.E.A. implements the above in order to achieve continuous improvement, a key factor for reaching higher levels of quality, and:

- ensures that this Policy is communicated and understood by all employees, making them aware of company guidelines and objectives;
- guarantees the availability of resources and information necessary to support the operation, monitoring, measurement, analysis and improvement of company processes.

Top Management communicates this Policy to employees and external interested parties and periodically reviews it to ensure its ongoing suitability.
